1.HOMEPAGE

- video (see Nayias email)

- text:

***DriveDrive* is a project initiated by visual artists Raissa Angeli and Nayia Savva. It's located in the old town of Nicosia, in a building designed by the modernist architect Neoptolemos Michaelides in 1969.**

***DriveDrive* displays a selection of artworks, editions and publications in a fluctuating, ever evolving manner. The process is archived in an online index publication.**

The space runs parallel to *TESTDRIVE*, a project hosting short-term site-specific events and parties.

***DriveDrive* and *TESTDRIVE* are the result of on going conversations and debates between friends, artists, artist-friends, and *artists' friends* concerned with the multiple localities involved in operating on-the-island.**

The project will be open to the public for the year 2018-2019.
